

Modern IT Asset Management (ITAM)

Omnitza's modern ITAM provides accurate inventory controls, workflow automation, and improved compliance for enterprise technology management, integrating effortlessly and rapidly with your existing IT, security and business systems.

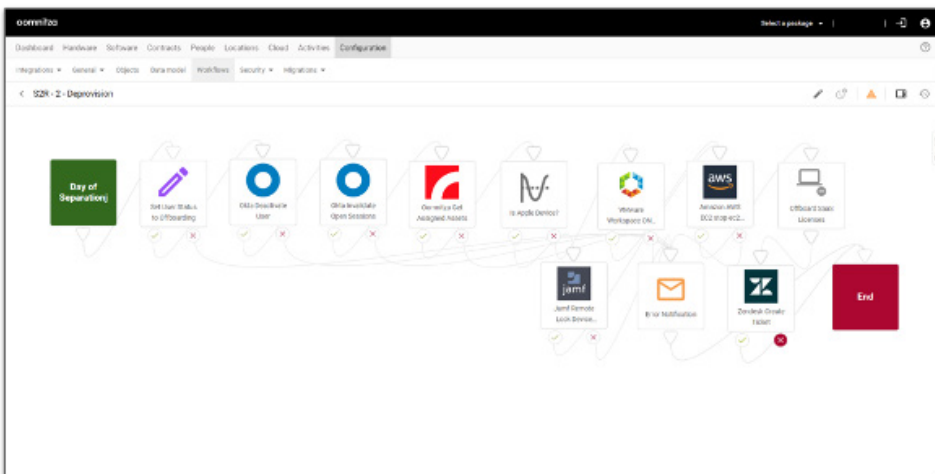

Challenge

As your IT environment becomes more diverse and complex, you rely on a greater variety of tools to manage it. While these tools address specific needs, they also create data and process silos. Fragmented and inaccurate inventory controls, piecemeal workflows, and compliance gaps lead to increased reliance on resource-intensive manual tasks and service tickets. Consequently, IT teams often fall behind on strategic business projects.

Solution

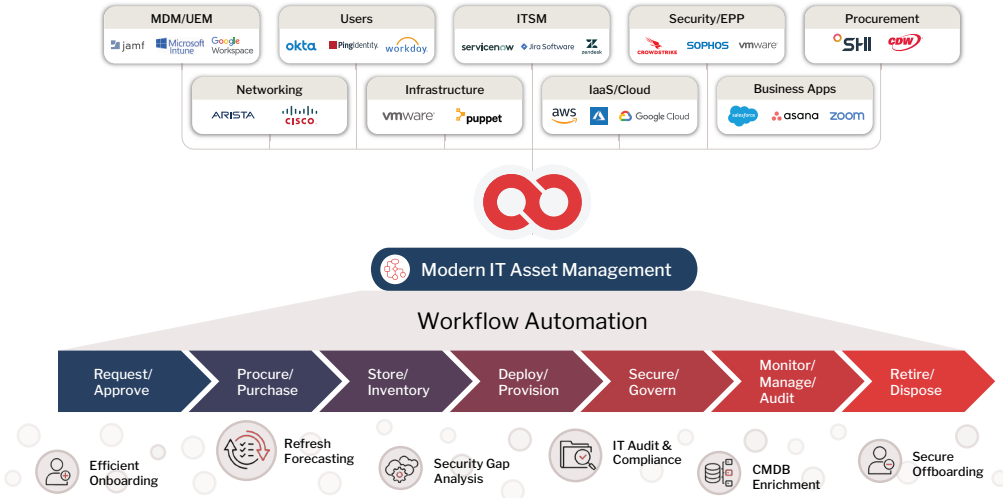

Omnitza offers a modern IT asset management (ITAM) solution that delivers accurate inventory controls, automates workflows, and enhances compliance throughout the entire lifecycle of your technology assets. It helps reduce manual tasks and service tickets, boost IT efficiency, eliminate redundant technology expenditure, and improve security, compliance, and audit readiness.

Business Outcomes

- 82%** of organizations successfully unified and centralized their technology inventory
- 63%** improved audit accuracy, timeliness & completeness
- 45%** increase in asset reclamation at offboarding
- 70%** reduction in prep time for technology audits
- 64%** reduction in ticket volume for asset lifecycle management
- 60%** reduction in onboarding time and effort
- 40%** improvement in forecasting accuracy
- 35%** savings on redundant SaaS and Cloud spend

Our agentless, SaaS solution integrates with your existing IT, security and business systems to discover, aggregate, correlate and enrich multi-source data, delivering comprehensive visibility and accurate inventory controls across endpoints, software/SaaS, cloud, networking and other digital technologies. This enables you to improve your technology data hygiene, enrich your CMDB and expedite audit readiness.

Modern ITAM provides a single source of truth for all your technology assets, enabling you to confidently automate essential IT processes. Omnitza offers pre-packaged low/no-code workflows for common IT processes like onboarding, offboarding, compliance and audit readiness, asset recovery, technology refresh, coverage gap analysis, SaaS lifecycle management, and more. These workflows can be easily configured to align with your environment and processes.

Omnitza's modern ITAM solution enables rapid use case implementation and quick time-to-value, beginning with data hygiene as the foundation. It delivers accelerated results within weeks, avoiding long, drawn-out custom projects.

Highlights

- Get visibility across your entire technology environment
- Achieve high levels of data hygiene for better decision making
- Leverage your existing IT, security and business systems
- Share asset context with your CMDB, ITSM and other tools
- Eliminate repetitive, error-prone, manual tasks with low/no-code workflows
- Automate IT processes with standardized, pre-packaged applications
- Improve forecasting, budgeting and purchasing schedules
- Identify/mitigate security exposures and compliance gaps; be audit-ready at all times
